

Lot 15 Timbertop Xmas Bells

SOLID BLACK HUACAYA FEMALE

on account of Andrew Brown & Cath Norman 08 8554 9547

DOB 20/12/06 • IAR 118547

Timbertop Xmas Bells' sire is Timbertop The Scud, who is the original Accoyo black male descendant in Australia. He has 300 plus progeny to his credit who all display great presence and looks backed by a heavy, defined and well stapled fleece.

Xmas Bells' dam still carries a lustrous, high quality fleece, which was 20.7mic, 4.5sd, 21.7cv on her 4th fleece.

Xmas Bells is reluctantly released as she is one of those elite black females that exhibits looks, fineness and an advanced fleece style which will undoubtedly help advance the progression of the brilliant black alpaca.

Timbertop Xmas Bells would be a huge asset to any stud program breeding black huacaya and we congratulate the successful bidder!

JD Status: Q Alpaca 06/0159
